

KEEP YOUR PETS *Safe*

For Dogs

- Make sure your pet goes to the vet for a checkup and is tested for heartworm
- Provide proper shade and housing
- Give them plenty of fresh, clean water and keep in a shaded area
- Add ice cubes to cool down the water
- Take water and a bowl for your pet when you go on walks
- Never leave your pet alone in a parked vehicle
- Do not walk your dog in extreme heat as their sensitive paw pads can burn

For Cats

- Keep water at room temperature
- Clean their water bowl daily
- Feed them wet food
- Use a stainless steel bowl
- Place their water bowl away from their food

*Be a responsible pet owner
and keep your pets safe from extreme weather*
